System Sensor (A Honeywell Brand) Inflation Surcharge Adjustment Effective May 2, 2022

Dear Valued Partner,

System Sensor remains committed to serving our partners during this unprecedented and challenging time. We continue to invest substantial time and resources into improving our production and delivery capabilities -- negotiating tirelessly with suppliers, increasing supply resiliency, and leveraging our engineering capabilities to design and redesign products in ways that minimize supply risks. Despite these efforts, robust inflationary pressures and exceptional market conditions beyond our control persist. Indeed, energy prices have risen over the past few weeks to their highest level in decades. Unfortunately, this means we must pass on an additional surcharge to support the cost of fulfillment and our ability to deliver orders.

As a result, System Sensor will be adding an incremental 3.75% inflation surcharge on **all orders that ship on or after May 2, 2022, regardless of when the order was placed.**

We recognize that these frequent changes are difficult to plan for and appreciate your understanding. We are working to share these updates with our partners as quickly as possible based on the constantly evolving market conditions.

Although our ability to pass through a portion of our costs is critical to our ability to effectively collaborate with our valued partners, please note that these new surcharges are not intended to alter any legally binding agreements between System Sensor and our customers. Should you have any questions regarding this announcement, please contact your Regional Sales Manager or Customer Service Representative.

Sincerely,

Stephen Ames,
Director of OEM, HVAC and Sprinkler Sales – System Sensor Americas
