February 28th, 2025

To Our Valued Partners,

At Winters Instruments, we review our list prices regularly to ensure we are priced appropriately according to market conditions. With that in mind, we are anticipating a price increase **effective May 1st, 2025.**

This price increase will allow us to remain competitive in the market and to continue to manufacture high-quality instrumentation for our customers.

More information will follow in the coming weeks with an updated price list available. In the meantime, if you have any questions, please do not hesitate to reach out to your Regional Sales Manager at Winters.

We thank you for your continued support and future business.

Sincerely,

Matthew Smith

President
